

PRACTICE CUTTING A HEART

Parent, cut out one of the cruise ships (rightly or lefty) and tape it to the back of your child's scissor blades, being careful not to inhibit the movement of the scissors. Then instruct your child to cut the heart, starting at the bottom and going at a slow, steady pace. At the top they will come into dock, let the passengers off (open the scissor blades) and turn the ship back out into the ocean (reposition to cut the other half of the heart). Give gentle reminders to keep the thumb up and maintain good posture.
